Title: Igneous, Sedimentary, & Metamorphic Rocks Kidspiration Project

Grade Level: 4th grade

Objectives/Directions:

- **Objectives:** Students will develop a better understanding of the 3 types of rocks by creating a kidspiration project on one of the types. Stud. will present their projects to classmates in order to enhance their public speaking skills.
- **Directions:**
 1. After reading the Science chapter on Rocks & Minerals, students will create a Kidspiration project illustrating one type of rock (igenous, sedimentary, or metamorphic).
 2. 1st the teacher will give a quick demonstration of how to navigate the Kidspiration program.
 3. Students will then follow the project direction page (attached) and will complete their rock project page.
 4. Stud. will present their projects to their classmates.

Technology Devices necessary: Kidspiration program

LoTi Level: 2
